

A Device Charging Rack is a 30 inch rack specifically designed to charge multiple devices at the same time, such as smartphones, tablets, laptops, or other electronic devices.

The Device Charging Rack is equipped with caster wheels, making it easy to move from one room to another. The Device Charging Rack can also be wall-mounted. It is commonly used in educational environments, offices, conference centers, hospitals, and other public spaces that require efficient and organized device management and charging.

Product Description

| | |
|-------------------|-----------------------|
| Product Type | : Device Charger Rack |
| Product ID | : DCR30 |
| Weight | : ± 55 kg |
| Dimension (DxWxH) | : 580 x 610 x 928 mm |
| Socket Port | : 30 ports |

Product Features

- Handle
- Input Power
- On-Off Switch
- Output Jack
- Handle with Lock
- Current Collector
- Silent Castors
- Septum Groove

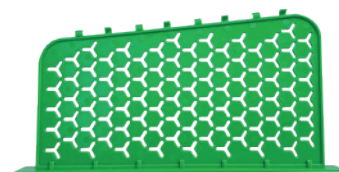

Handle with Lock

Charging Ports
15 USB Type A 3.0 & 15 USB Type C

Power LED, Breaker, and
Input Power

Has 30
Partition

Product Description

Input Voltage : 220V-240V
Input Current : 10A
Output Single Port Power : 65W
Total Output : 1950 (65W*30)

Product Includes

- Charging Cabinet
- Power Cable
- Handle
- 4 pcs 3 inch Castor
- 16 pcs M8*25 Screw
- 2 pcs M8*35 Screw
