

The wallmount frame is a durable and space-saving solution for mounting equipment that follows the 19-inch international standard. Built with a welded structure for enhanced strength and stability, the frame supports a static loading capacity of 60 kg, making it suitable for a wide range of networking and IT applications.

Easy access with dynamic mounting provides flexible device configuration options from the front, right side, or left side. The setup is versatile, allowing both wall-mounted and floor-standing installations.

Product Description

Product Type	Wallmount Frame
Product ID	WF5508
Size	8U
Weight	± 8,2 kg
Dimension (DxWxH)	550 x 550 x 445 mm
Complete Set with	• 1 Unit PDU 6 Germany outlet with switch • 4 pcs Dynabolt • 20 set Cagenuts & Screws
